

# ANNA VAILANKANNI COLLEGE OF ENGINEERING

(Approved by AICTE, New Delhi & Affiliated to Anna University)

PLACEMENT BROCHURE 2016-2017

[www.avce.edu.in](http://www.avce.edu.in)

## Chairman

I am extremely happy to bring out our Placement Brochure for the academic year 2016 - 2017. Annai Vailankanni College of Engineering, Kanyakumari was founded in 2008 with the vision of providing quality engineering education to the rural population. Our focus has always been at producing employable engineers who can be creative, innovative and able to transform their professional skills into business value.

I am glad to know that our students have proved their technical acumen and project development skills by winning National level competitions apart from excelling in their academics. We have been awarded the first position among 386 submitted projects, at the state level **Dr. Abdul Kalam Young Achievers Award** conducted by World Youth Federation in association with Anna University. Our college racing team was also among the finalists in the National level SAE-GBU racing event and they went on to win the fifth position overall and first position under Safety category.

Our students are exposed to the technologies and industrial development courses which were conducted online by IIT / IISc professors. The certificates were provided after passing the examinations and completing the required assignments.

I would attribute the primary reasons for this success to our well qualified and dedicated staff members. We make sure to have a staff to student ratio of 1:10 so that individual attention is provided to the students.

Our alumni are working in notable organizations like GAIL, Ashok Leyland, TAFE, Infosys, TCS, Sharda Motors, Soft square etc. The highest placement offer in the 2016 batch is by Mckinsey & Company.

### Vision:

Community Enhancement through excellence in engineering education.

### Mission:

To enhance holistic development among engineering students there by improving their personal, professional and social competencies.

Considering our strengths, Bosch Automotive has started a joint certification training centre at our institute to impart training in areas such as Automotive Electrical System, air - conditioning and battery servicing. Govt., of India has approved our college as a training center for skill development under Pradhan Mantri kaushal Vikas Yojna (PMKVY) Scheme.

One of the important values of this institution is to give back to the society where we are in. In this brochure, we have highlighted some of the socially relevant projects and other activities completed by our students. Some of our best student profiles are also provided in this brochure for your reference. I am sure these students, if selected will be a long term potential asset for your organisation.

D.Peter Jesudhas  
Founder - Chairman

## Research and Development

Vincent Jain Director

Research and Development plays an important role in the innovation process. It is one of the means of developing new ideas and skills which are indispensable to the engineering students. In line with this vision, the AVCE Research and Development Cell is functioning for the past couple of years.

We give utmost importance to the skill development of our students so that they become employable engineers. The R & D cell is instrumental in providing exposure to the students, collaborating with industry personnel, organizing seminars and thereby helping the students build projects which are beneficial to the society. Some of these projects are completely implemented to be used by public and are currently in the patent review process.

On the course of completing these projects, our students not only become skilled engineers but also add value to society. Considering the problems faced by the fish vending women in the district of Kanyakumari, our students have designed and developed a solar powered tricycle. This will considerably reduce the hardships of these women and improve their economic status.

The R&D cell also provides the necessary platform to the students to exhibit their talents in various fields. The on-road and the off-road race cars designed and developed by our students and LED illumination for fishing boats fabricated by our students bear testimony to this.

Some of the projects carried out by the students under the guidance of the staff members are presented in detail in the respective departments. We also hope that our R & D Cell will contribute sufficient skilled youth to Skill India Mission initiated by our Hon. Prime Minister Shri. Narendra Modi. AVCE will work to be a part of his dream "India can become the world's largest provider of skilled workforce for the world".

## Training & Placement

The Department of Placement and Training at Annai Vailankanni college of Engineering focuses on equipping the students to face the challenges in getting placement in reputed companies. Placement Department prepares them not only to get a job but also face boldly, the socio- economic challenges. They are provided with required technical skills to cherish in life with high self-esteem.

We have made our students to face the competitive world with confidence. Every student is recognized as a unique individual with potential to develop academically, socially, physically and emotionally. We give all types of training and coaching to our students right from motivational workshops to inspiring technical workshops with professional trainers to develop them and strengthen them to face this competitive world. Apart from the value added technical training provided to our students to enrich the industry needs, we also make them learn the corporate and social etiquettes through sessions which cover dimensions of personality, self-awareness and self-esteem.

Right from first year we make our students build their soft skills. We encourage them to develop their own projects, websites and applications which bring them State and National level acclaims. Our students winning Abdul Kalam Young Achiever's Award 2016 was not a day's work. It took months of dedicated and committed efforts.

N.Rahul

Training and placement officer

We have made remarkable changes in the careers and life of our students, salary ranging from 2.42 lakhs to 3.75 lakhs were been offered for our students, but all these were possible only when our students realized themselves that self-motivation and trust is factor of being harmonious in life. We fervently hope that our students will be an asset to any organization looking for development. Their committed behavior and pleasant attitude will definitely contribute to the socio economic development of any organization. We work with a motto that "Before being adaptable be dependable".

We have presented some of the projects and activities carried out by our students. These activities have enabled them to acquire good technical skillsets and also provided them with good exposure to engineering. We are confident that our students will be able to add value to the organization where they pursue their career.

**ANNAI VAILANKANNI COLLEGE OF ENGINEERING is approved by MHRD, Govt of India and AICTE to run the Pradhan Mantri Kaushal Vikas Yojna (PMKVY) Scheme for the following courses**

- CNC Operation Machining Technician Level 3
- CNC Operation Machining Technician Level 4
- Lathe Operator
- CNC Setter cum Operator - Turning

*“Skilling is building a better India. If we have to move India towards development then Skill Development should be our mission”*
