The First Party represented herein by its Principal, Annai Vailankanni College of Engineering, and the Second party, MATT Engineering Equipments, Nagercoil-629001 and represented herein by its Managing Director, Er.M.Praveen Mathias.

(First Party and Second Party are herein after jointly referred to as "Parties" and individually as "Party" as

WHEREAS:

A) First Party is a Higher Educational Institution named **Annai Vailankanni College of Engineering**, A.V.K. Nagar, Azhagappapuram Post, Kanyakumari District, Tamilnadu-629 401.

B) First Party & Second Party believe that collaboration and co-operation between themselves will promote more effective use of each of their resources, and provide each of them with enhanced opportunities.

C) The Parties intent to cooperate and focus their efforts on cooperation within area of Skill Based, Training, Education, Placement, Industrial Visit, Expert Lecture.

D) MATT Engineering Equipments, Nagercoil-629001, - the Second Party is engaged in **Training, workshops, Internships, Project and Product development in domains of Robotics, IoT, Embedded systems, Mobile App development and Machine Learning.**

NOW THEREFORE, IN CONSIDERATION OF THE MUTUAL PROMISES SET FORTH IN THIS MOU, THE PARTIES HERETO AGREE AS FOLLOWS:

CLAUSE 1 CO-OPERATION

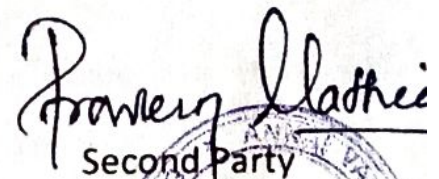

1.1 Both Parties are united by common interests and objectives, and they shall establish co-operation.

1.2 First Party and Second Party co-operation will facilitate effective utilization of the intellectual capabilities.

1.3 The parties shall co-operate with each other and shall as promptly as is responsibly practical, relevant agreement.

Eco-system

Training platforms and industry, which for long have been operating in separate domains, are rapidly inching closer to each other to create synergies. The constantly changing training paradigms, in response to growing complexity of the business environment today have necessitated these two to come closer. Training platforms not only contribute skilled human resources to business, but also in various intangible ways. The intersecting needs and mutually interdependent relationship require identifying means of further strengthening Pre-Job training-industry partnerships.

Industry Academia collaboration Thaimozhikalvi Pvt Ltd Chennai(Ed-zoe) organized Job training for women employment in digital space to all department students of Anna Vailankanni College of Engineering,

Six strategies to increase young women's access to digital jobs

The digital economy can create new job opportunities for young women and help address the persistent gender disparity in the labor market. Jobs involving remote, online, flexible work can help young women overcome mobility constraints, challenge restrictive gender norms, and reduce longstanding occupational segregation in traditionally male-dominated industries.

However, practitioners would need to be intentional about using better targeted strategies in program design to help young women succeed in high-quality digital jobs , and also move up to higher skilled and higher paying digital jobs over time.

1. Assess the demand drivers for digital jobs, and then equip young women with skills to perform those jobs

Programs must first identify where new digital jobs are likely to be created. In the Digital Jobs for Youth: Young Women in the Digital Economy report,

Four key drivers of demand for digital jobs: (a) Public Sector, (b) Private Sector, (c) Online Outsourcing, and (d) Digital Platforms for on-demand services (e.g., Uber) or). Mapping local drivers of digital jobs can help better target jobs programs.

For example, a program to support job creation for rural women with limited digital skills may focus on digital micro work opportunities. In contrast, another program for unemployed, college-educated young women could invest more in digital entrepreneurship jobs.

2. Be creative and use multiple recruitment strategies

Young women face severe time constraints due to household responsibilities. Enrolment strategies need to be creative and use multiple channels like community mobilization techniques, door-to-door outreach, strategically located information social media advertisements. Plan International's Saksham project in India used announcements on cars to spread awareness

3. Address high dropout rates

Young women often withdraw from training programs because they do not perceive a clear connection for how their new skills will improve employment prospects. On-the-job training can provide financial motivation. The World Bank's Gaza Emergency Cash for Work and Self-Employment project, for example, provided two months of digital skills training and six months of on-the-job support to young women.

4. Focus on building self-confidence

Program teams need to dedicate class time for beneficiaries to speak in front of peers, including expressing difficulties with courses, which can also help prevent dropouts.

5. Train, mentor, and support female digital entrepreneurs

While digital technology is creating new entrepreneurship opportunities, young women face several barriers. The World Bank's 2019 Profiting from Parity report is a helpful resource for practitioners designing programs to support female digital entrepreneurship. In addition to training, mentoring, and supporting women's financial inclusion, digital job programs should enhance the professional networks of young female digital entrepreneurs.

6. Leverage infrastructure projects for scaling up job creation

COVID-19 has highlighted the increasing urgency with which the digital divide needs to be addressed. As governments increase investments in internet connectivity, digital infrastructure, and rural broadband, it is essential to embed an explicit jobs agenda in those large public infrastructure projects

Drones

Precision and Targeting

Drones equipped with advanced imaging and sensor technologies can precisely target specific areas of a field that require treatment. They can identify and apply treatments only where necessary.

Efficiency and Speed

Drones can cover large areas quickly, especially in open fields, due to their ability to fly autonomously and follow pre-programmed flight paths. They can accomplish spraying tasks efficiently, saving time and labour.

Safety and Accessibility

Drones can access difficult or hazardous areas without requiring farmers to physically enter those zones. This enhances safety and reduces the risk of accidents, especially in areas with rough terrain or obstacles. Students can acquire and learn from India's highly qualified & most experienced drone training instructor.

Report on Awareness programme on "One Million Ideas" in the topic "Be a transformational leader, become an entrepreneur - Amazing ideas await you" on

12th October 2021

On 12th October 2021, awareness programme was conducted in the topic, "Be a transformational leader, become an entrepreneur – Amazing ideas await you" at our college campus. The awareness programme on "ONE MILLION IDEAS" was originated from the Tamil Nadu government Entrepreneurship Development & Innovation Institute (EDII-TN) through Academic Innovation and Entrepreneurship Development Programme.

Following promotional poster was designed and circulated in the social media and in the student WhatsApp groups. And the same was kept as the backdrop at the BOSCH training room.

Er. Dheebin, Founder & MD of Kumari Shopy, was invited to the programme as a resource person. He was a 24-year-old young entrepreneur who founded his e-commerce company Kumari Shopy during his final semester of studies on February 14th, 2019. It has inspired our students to pursue their dreams of becoming entrepreneurs.

The following is a welcome poster that was designed and is displayed at the college's front portico to greet our visitors. The guests were greeted warmly and then led to the Principal's office for high tea and discussion. Following a brief discussion, the guests were directed to the BOSCH training room to start the awareness programme.
